

INTERNATIONAL DERMOSCOPY SOCIETY (IDS)

A Sub-Specialty Meeting - EADV Congress in Paris

September 17th, 2008.

4 hours (10 minutes each lecture)

TITLE: DERMOSCOPY UPDATE

Chairmen: Giuseppe Argenziano (Italy) & Luc Thomas (France)

1. Giuseppe Argenziano (Italy): IDS studies update
2. Ralph Braun (Switzerland): The furrow ink test for the diagnosis of acral melanoma
3. Harald Kittler (Austria): Pattern analysis revisited and revised.
4. Rainer Hofmann-Wellenhof (Austria): Dermoscopic patterns of nevi on the scalp
5. Josep Malvehy (Spain): Development of a combined algorithm dermoscopy/confocal microscopy for the management of cutaneous tumors
6. Giovanni Pellacani (Italy): Dermoscopy and confocal microscopy: in-vivo methods for the evaluation of the biology and evolution of melanocytic nevi
7. Ketty Peris (Italy): Dermoscopic features of basal cell carcinoma: morphologic variability and interobserver agreement on dermoscopic patterns and diagnosis.
8. Susana Puig (Spain): New insights in the dermoscopic and molecular characterization of melanoma.
9. Pietro Rubegni (Italy): Objective melanoma changes.
10. Stefania Seidenari (Italy): Dermoscopy of in situ melanomas.
11. H. Peter Soyer (Australia): The impact of clinical information in the histopathologic diagnosis of melanocytic skin neoplasms
12. Wilhelm Stolz (Germany): Lentigo penis. A hypothesis for pathogenesis
13. Luc Thomas (France): Dermoscopy of fully regressive melanoma
14. Pedro Zaballos (Spain): The thousand faces of dermatofibromas
15. Iris Zalaudek (Austria): 3 roots of melanoma
