

World Wide Dermoscopy Map

After the first two collections of funny images on dermoscopy – which were presented during the IDS meetings in Brisbane (2012) and Vienna (2015) and even published (1) – we like to start a new project for the IDS meeting in Buenos Aires (2021) and for the IDS home page.

Therefore we ask you for **country images on dermoscopy** on which you see any country, continent, city, map, banner etc. of our world - here two examples:

Argentina (from Horacio Cabo)

Africa (from Andreas Blum)

If you like to join this project and if you have such a dermoscopic image, please mail this with your name and address to Andreas Blum (a.blum@derma.de) – **thank you very much**.

The plan is to present this during the next IDS meeting in Buenos Aires in 2021 and to bring it on the IDS home page as a **WORLD WIDE DERMOSCOPY MAP**. All participants will be named - if you do not like to be mentioned, please indicate this on your submission.

Submission will be closed on January 31, 2021.

Andreas Blum and Gery Gabler (July 2018).

1) Blum A, Argenziano G, Bowling J, Giacomel J, Hofmann-Wellenhof R, Kreusch J, Zalaudek I, Grichnik J (2012) Rorschach dermoscopy. Arch Dermatol 148:1342.
